Press release, May 20, 2015

## Formpipe signs a strategically important deal with a Danish authority

The Danish Prosecution Authority choose the ECM product, Platina by Formpipe in order to streamline the document and case management related to criminal cases, administrative matters and appeals.

“Platina is an established ECM product used in many Swedish authorities such as the Swedish Tax Agency, county administrative boards, the judiciary and authorities within the Swedish Defense. Our operations in Denmark holds a large share of customers in the municipal market, but we see opportunities to expand our presence even among the Danish Government authorities and therefore this is a strategically very important deal”, says Christian Sundin, CEO of Formpipe.

“Establishment of previously unknown products on a new geographic market in the public sector is made possible by strong references and by being able to offer a locally established delivery organization, in these respects we have a strong case. Cross-selling of our products is an important key to continued growth in revenues within the public sector” says Christian Sundin.

The Danish Prosecution Authority has 1,100 employees and is present in all the country's 12 police districts. The initial business value amounts to SEK 1,5 million, of which about half are recorded in second quarter of 2015.
