

Press Release, Friday October 18, 2024

# Cybersecurity incident at Formpipe's Danish subsidiary.

**The Danish subsidiary of Formpipe has identified a cybersecurity incident affecting some internal servers in Denmark. As of now, Formpipe assesses limited impact on its operations.**

- Formpipe has taken immediate action and has engaged professional cybersecurity experts for incident management and business continuity
- Formpipe has notified the Danish Police and the Danish Centre for Cyber Security and notified the Danish Data Protection Agency of the incident in accordance with Danish data protection laws
- The incident is isolated to the Danish operation of business area Public, i.e., there is no impact on the Swedish and other international Formpipe customers
- The incident only affected internal servers and systems. No production systems or customer-facing solutions are affected, meaning no exposed customer data that we are currently aware of. However, all relevant customers are contacted and precautionary measures for further protection are taken
- The affected systems have been taken off-line. This may have a short-term impact on the capacity of our customer support service in Denmark
- The financial impact on the fourth quarter results is deemed to be minor.

We continue to monitor and manage the situation and will publish further information when deemed relevant.
